1. Qualitative Information on Quarterly Financial Results under Review

(1) Explanation of operating results

The economic situation during the three months ended June 30, 2022, has remained on a slow recovery trend since COVID-19 countermeasures of major economies have shifted to aiming at both epidemic prevention and economic recovery. As Russia began invading Ukraine in late February, however, the outlook for the economic environment has become uncertain. During the period under review, while production adjustments by automakers in response to insufficient semiconductor supply had only a minor impact, there has been increasing an impact of surging raw material costs, transportation costs, and fuel costs. Japan has also been significantly affected by production adjustments by automakers in response to the lockdown in Shanghai that started in April.

Under this management environment, consolidated net sales increased 2.2% year-on-year to 19,389 million yen. As for gains and losses, operating profit decreased 66.6% year-on-year to 447 million yen due to the significant impact of increases in raw material costs, transportation costs, and fuel costs, and ordinary profit decreased 22.6% year-on-year to 1,080 million yen, as temporary income from the gain on sale of non-current assets owned by subsidiaries and the foreign exchange gain was not able to recover the decrease in the operating profit. The profit attributable to owners of parent decreased 0.6% year-on-year to 861 million yen despite of the gain on termination of retirement benefit plan due to change in the retirement benefit plan of the Company.

The Group's business performance by segment is as follows.

Functional Parts Business

Due to production adjustment by automakers in response to insufficient semiconductor supply, net sales decreased year-on-year by 10.1% to 7,893 million yen. Segment income decreased 41.2% year-on-year to 744 million yen due to the significant impact of rising raw materials prices and surging transportation costs.

Anti-Vibration Parts Business

Net sales increased 13.7% year-on-year to 8,080 million yen due to steady orders for construction machinery. Segment income decreased 44.9% year-on-year to 278 million yen due to surging costs for materials for metal parts.

Metal Business

Net sales increased 20.3% year-on-year to total 1,576 million yen. Segment loss was 2 million yen (compared to a loss of 13 million yen for the same period of the previous fiscal year), despite an improving trend due to the effect of efforts for streamlining and the effect of reflecting costs for materials for metal parts in selling prices.

Hose Business

Net sales increased 3.3% year-on-year to 1,239 million yen as orders remained steady. Segment income decreased 62.7% year-on-year to 34 million yen due to surging raw material prices.

Industrial Equipment Business

Net sales increased 0.1% year-on-year to 750 million yen as orders remained steady. Segment income decreased 20.5% year-on-year to 114 million yen due to surging raw material prices.

(2) Explanation of financial position

Total assets as of June 30, 2022, were 67,714 million yen, an increase of 2,675 million yen from the end of the previous fiscal year.

Current assets increased 1,500 million yen from the end of the previous fiscal year to 39,244 million yen. This is due primarily to an increase in notes and accounts receivable - trade as a result of the recovery in orders.

Non-current assets rose 1,174 million yen over the end of last fiscal year to total 28,469 million yen. This is due primarily to the effects of foreign currency translations and the acquisition of property, plant, and equipment.

Liabilities increased 600 million yen from the end of the previous fiscal year to 31,263 million yen. This is due primarily to an increase in notes and accounts payable - trade and electronically recorded obligations - operating.

Net assets totaled 36,451 million yen, an increase of 2,074 million yen from the end of the previous fiscal year. This is primarily due to increases in retained earnings and foreign currency translation adjustments.

As a result, the shareholders' equity ratio came to 50.4%, up 0.9 percentage points from the end of the previous fiscal year.

(3) Explanation of future forecast information such as consolidated financial results forecasts

The forecast of consolidated results for the fiscal year ending March 31, 2023, has become increasingly uncertain due to the production adjustment by automakers and the increase in raw material prices and transportation costs in response to Russia's invasion of Ukraine and the lockdown in Shanghai, China. However, the figures released on May 13, 2022, are unchanged, as we will make a Company-wide effort for further streamlining and efficiency improvement to lower the break-even point and for reflecting the increase in raw material prices in selling prices.

The above forecasts represent the Company's best judgment based on information currently available. Actual results may vary from the above forecasts due to various factors.

(3) Notes to quarterly consolidated financial statements

(Notes to assumptions for ongoing concerns)

Not applicable.

(Notes when there is a significant change in the amount of shareholders' equity)

Not applicable.

(Adoption of special accounting procedures used in preparation of the quarterly consolidated financial statements)

(Calculation of tax expenses)

With respect to tax expenses incurred by some consolidated subsidiaries, the Company reasonably estimated the effective tax rate after applying tax effect accounting to profit before income taxes in the fiscal year, including the first quarter under review, and calculated them by multiplying this estimated effective tax rate by profit before income taxes.

(Additional information)

(Shift of the retirement benefit plan)

On April 1, 2022, the Company completely shifted its defined-benefit corporate pension program to a defined-contribution corporate pension program. The Company adopted the Accounting Procedures for Shifting between Different Retirement Benefit Programs (ASBJ Implementation Guidelines No. 1, December 16, 2016) for the accounting procedures for the shift of the pension program. For this reason, the gain on termination of retirement benefit plan of 554 million yen was posted as the extraordinary income for the three months ended June 30, 2022.

(Segment information)

Segment information

- I. Three months ended June 30, 2021 (from April 1, 2021, to June 30, 2021)
 - 1. Information on net sales, income or loss by reporting segment

(Million yen)

		Rep	orting segm	nent				Quarterly consolidated
	Functional Parts	Anti- Vibration Parts	Metal	Hose	Industrial Equipment	Total	Adjustments (Note) 1	statement of income amounts (Note) 2
